

Reliability Engineer - Gent

Cargill

Cargill provides food, agriculture, financial and industrial products, and services to the world. Together with farmers, customers, governments, and communities, we help people thrive by applying our insights and over 150 years of experience. We have 160,000 employees in 70 countries who are committed to feeding the world in a responsible way, reducing environmental impact, and improving the communities where we live and work.

Job location: Ghent, Belgium

The Cargill site in Ghent consists of a rapeseed/soybean crush plant, a vegetable oil semi-refinery, a multi-feedstock biodiesel plant & a waste-based biodiesel plant

Position Purpose & Impact

The Reliability Engineer will apply technical knowledge to deliver continuous improvement in process and asset reliability through the detection and elimination of defects. In this role, you will partner with the team to ensure the fulfillment of reliability engineering strategies.

Qualifications

- Bachelor's degree in a related field or equivalent experience
- Minimum of two years of related work experience
- Solid knowledge in the application of reliability tools
- Knowledge in maintenance process management
- Project management experience
- Experience creating complex tests and analysis
- Predictive maintenance technologies experience

Our Offer

We provide a fast paced stimulating international environment, which will stretch your abilities and channel your talents. We also offer competitive salary and benefits combined with outstanding career development opportunities in one of the largest and most solid private companies in the world.
